Dear NSTF Member Organisation,

SET Bursary Database: www.sciencebursaries.org.za

The NSTF has created an online Bursary Database, for studies in the sciences, engineering and technology.

The Bursary Database is searchable, by:

- Science and technology related career
- By qualification
- By university or university of technology
- By bursary provider

As an NSTF Member, your organisation can post your bursary information on the website FREE of CHARGE. This is one of the benefits of NSTF Membership.

The Bursary Database aims to benefit the following people who need information in ONE PLACE on the web, about available study funding opportunities.

- High school learners
- Educators of Mathematics, Physical Science, Life Science, and Life Orientation
- Students, and prospective students

Join us today to address the dire need for coordinated information, by registering at this link [link], and then filling in an online form of bursary information. After approval, your bursary information will appear on the website. You may update the information at any time by logging in with your password.

Comments and feedback to Tshego at tmonama@nstf.co.za.

The bursary database and website have been created with sponsorship from UNESCO National Commission in South Africa and the Department of Science and Technology.

Regards

Jansie Niehaus
